

NEOSOFT POSITIONING AID

A Developmentally Supportive Care (DSC) Device For SUPINE / SIDE LYING / PRONE Positioning of Premies...

The **Neosoft Nesting Set** menage includes bendable positioning aids that stay in place until it is reshaped by the care giver. They can be molded into the desired shape to promote containment and to provide a reflex stimulus for extremity extension & subsequent flexion recoil.

FEATURES

- It supports **Supine, Side Lying & Prone**, all **Developmentally Supportive Care (DSC)** Positioning to Premies & helping them in their journey during **NICU** stay.
- It is a complete Set of Nesting having 4 elements, Moldable Main Nest & Head Positioner, both remain in desired shape until unless they are reshaped, Sheet with Strips & ultra soft detachable Bolster to be placed at the center of the main nest to give infant the feel of mother womb when feet touches to it & can be kept below the baby in case of extreme premie.
- The high end imported & unique finished product is covered with waterproof material that can be simply sanitized which is again covered with washable finest baby friendly reusable clothing material that can be easily washed & autoclaved to disinfect.
- Clothing Cover Set also available separately.
- **Hospital logo can be placed for Corporate Customization.**
- The Nesting Set can also be used at home for further development of babies & to keep them safe & secure and for sound sleep.
- Comes with two sizes 1. Predominant (mainly used) 2. For Extreme Premies, can also be redesigned as per NICU / Baby needs.

The sui generis feature of its hermetically sealed wand, Main Nest, provides liberty to use it in any desired shape / extent to keep baby safe & in appropriate posture as per clinical / NICU needs.
